The Keys to FullHouse success.

Dogs- Puppies your handlers have many hours and lots of money training you to run independently, feel free to show them how well they have trained you by ignoring them and taking whatever you feel the need to take. Remembering as you run you need 3 single jumps, two tunnels or panels, and one joker (today's jokers, A frame, Teeter, Combo in flow). Dogs please remember no matter what you think your handler does not count as a Joker for points. If you happen to miss one of these you will not Q, but you may blame it on your handler for mis-directing you. You must take the start jump to start time.

Handlers - You may attempt to direct your dog, or he may run on his own ignoring you completely as you scream and yell their name or obstacle. Just remember to get them to take the finish jump at the end of the run to stop time. The finish jump is live as soon as timer says go. The start line is Bi-directional.

When the horn sounds you have 5 secs to get to the finish jump., after which you will start losing 1 point for each full second over 5. Until your dog takes the finish jump. After the horn there is no more point accumulation.

Times:

4, 8, 12, = 40 secs plus 5 to the table.

16,20,24 = 35 secs plus 5 to the table.

Snooker 3,5,C

For the 4 legged part of this team. As you enter the ring for snooker remind your 2 legged partner that your plan has red, color, red, color, red, color. Should your partner cue you at the wrong time and you drop a red bar, you need to find another red. Each red is only used once. If you happen to drop a color you will get a zero and proceed to the next obstacle in your sequence. This has completed the opening, follow 2 thru 7 to complete the closing. When you finish the closing or happen to hear THANK YOU, take your handler directly to the finish jump.

Today #2, is bi-directional in the closing. The start line is not bi-directional. There are 2 combos on the course, in the opening just get all parts done, any direction or flow is okay.

Dogs enter at #6 or the horn.
4, 8, 12, = 55 secs
16,20,24 = 50 secs
